

OMAR NAJIA

GLOBAL HEAD DERIVATIVES, BB ENERGY

Began my career trading physical oil before moving on to trade paper and futures which became affectionately known as derivatives trading. My first love in that space is options trading. I enjoy technical analysis, specifically Elliott Wave and I apply that to most of my trades. I am not a believer in cause and effect in markets nor am I a believer that fundamentals drive much of anything. Sentiment is all. This is the way.

Pet peeve: OPEC Favourite colour: Yellow Best Market Quote: Everything has an end except a sausage, it has two. This is the way.
