

RANDALL MOHAMMED

FORMER VP, ENERGY SOLUTIONS, AHART SOLUTIONS INTERNATIONAL

Randall Mohammed is an energy professional with a strong background in providing strategic and operational leadership and consultancy in the oil and gas sector. Over the past decade he has held several Executive management positions in the energy sector based in Dubai, UAE. He's a member of the Dubai Petroleum Club and a regular contributor on Gulf Intelligence's weekly energy podcast – US and global energy perspectives. One of his passions is knowledge sharing and he has written several articles on oil price volatility, rise of renewable energy, the economics of natural gas, zero carbon power generation, economic diversification for oil producing nations, US energy dominance, Production Sharing modelling, and optimizing oil and gas molecules in Guyana. As the former VP of Energy Solutions with ASI, Dubai he specialised in gas monetisation and smallscale LNG, working alongside Shell LNG and OEMs such as GE, Chart, Galileo and BeerensGas. His research into nano and micro LNG combined with his expert knowledge in virtual pipelines, market trends and pricing allowed him to develop unique advisory services in gas monetisation. His articles “Small-scale LNG for a Brighter Tomorrow” and “Battle for gas supremacy in the Eastern Mediterranean” was featured in Gastech's 2018 publication and he has posted several articles and opinions on natural gas, LNG and clean power generation. Notable projects include PDO flare gas mitigation in Oman, small-scale LNG in Indonesia and Oman and flare gas mitigation in Nigeria. Today Randall continues to be passionate about natural gas and LNG and believes that beyond the gas to coal conversion gas will play an even more essential role as a destination fuel in the energy mix.
